Ministry of Higher Education and Scientific Research

Erbil Polytechnic University

College of Technical Engineering

Information System Engineering Department

PhD Student Name: …Rebwar…………………………………………..

Title: …Scocial algorithms for complex engineering and science…

………………………………………………………………………………………………

#	Evaluation Criteria	10 Marks each
1	How is the Presentation?	8
2	Is the presentation reflecting the report submitted and has novel ideas and results?	
3	Does the title represent the contents?	
4	Is the objective and problem statement clear and novel ?	
5	Is the literature review relevant, critical, and up to date? Novelty of the PhD problem	
6	Are the methods properly described?	
7	Is the analysis of the results clear? If available? If there are no results yet, then has the PhD student obtained the needed skills to start implementations or simulations?	
8	Is the discussion of the results clear and meaningful?	
9	Any papers published or submitted? or publication plan (Gantt chart).	
10	Is the time frame in the Gantt chart (in the report) reasonable for a PhD study? and reflect the real progress?	
Total Mark (100)		
Recommendation: **The student needs to discuss more with his supervisor for important issues in his research**
