Research project information form

The project Tittle: Measuring the sound Noise level Dibs Health Hospital and Their Impacts on The Study Environment by applying a questionnaire

Student Name: هاجر فؤاد احمد

The aim of this Project: Measuring the sound Noise level Dibs Health Hospital and Their Impacts on The Study Environment by applying a questionnaire.

Project Summary: In this research project, I will investigate about the most importance sources of noise pollution at *Dibs Health Hospital-Kerkuk governorate* as An Example by using a sound level instrument (Parkside Sound Level Meter New 2020 Model -PDEME 130 A1) and giving questionnaire paper to (50 workers) in different departments who work in tis hospital. This questionnaire asked the workers about their sex gender, department then asked them what was the noisiest sources in the hospital .

Those noise sources will be: loud noise music, generator noise, vehicles noise, girls chatting noise, boys chatting noise, workers and visitor's voice from outside the hospital, Walking noise, other sources of noise...etc.

This study will give a brief information to Dibs Health Hospital about the main sources of nose with suggestions to decrees it.

Supervised by
Dr.Kasim Fawzy Ahmed
