Research project information form

The project Tittle: *Study of Environmental Noise Pollution in The Cafeteria of Education College-The East Bank and Their Impacts on The Study Environment*

Student Name: ايمان سوران مغديد

The aim of this Project: Measuring the sound Noise level The Cafeteria of Education College-The West Bank and Their Impacts on The Study Environment by applying a questionnaire.

Project Summary: In this research project, I will investigate about the most importance sources of noise pollution at the Cafeteria of Education College-The West Bank as An Example by using a sound level instrument (Parkside Sound Level Meter New 2020 Model -PDEME 130 A1) and giving questionnaire paper to (50 male and 50 female) student in different departments who use the cafeteria. This questionnaire asked the students about their sex gender, department, study's hall number then asked them what was the noisiest sources in the cafeteria .

Those noise sources will be: loud noise music, generator noise, vehicles noise, girls chatting noise, boys chatting noise, Teacher voice from outside the hall noise, Walking noise, other sources of noise...etc.

This study will give a brief information to the college of Education about the main sources of nose with suggestions to decrees it.

Supervised by

Dr.Kasim Fawzy Ahmed
