Dear Dr. Omar Aziz,

Thank you for completing the review of the paper #1570869581 ("Seismic Performance Assessment of Steel Structures Considering Soil Effects") for 9th IEC-2023. Below is a copy of your review.

You can modify the report by going to <https://edas.info/R.php?r=11930036> up to the due date of Jan 15, 2023 03:59 America/New_York.

Best regards,
The conference chairs

> *** comments To authors: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper. Please provide detailed comments that will be helpful to the TPC for assessing the paper, as well as feedback to the authors.

1. Abstract to be revised, indicate to the results obtained.
2. Conclusions very weak.
3. More discussions required for results.

> *** Comments for TPC members only: Write any additional comments for TPC members only. Refrain from duplicating those in detailed comments. The authors will not see these comments.

Its required to explain more details about the effect and category types of soil.

> *** Originality of the submission: New or Novel contribution
Accept (8)

> *** Significance of Topic: Relating to knowledge contribution
Accept (8)

> *** Paper Presentation: Clarity and Organisation of Content
Weak Accept (6)

> *** (reviewer) expertise: Define your (reviewer) expertise on subject of the paper. This will only be seen by the Technical Program Committee.
Average (4)

> *** Language: Clear the revision of paper language
above average (3)

> *** Recommendation and Review: Overall view and recommendation
Accept (8)

> *** Strength Points: please write the strength point of the paper

Seismic effects of buildings very important subject especially after earthquakes happen in our region.

> *** Weakness Points: please write the weakness point in the paper
