09 October 2020

Dear Dr. Ahmad,

On behalf of the Physics Without Frontiers Committee, I am pleased to inform you that you have been selected to participate in the PWF Project “Iraq – Advanced Quantum Mechanics University Course”, taking place from October 2020 to January 2021.

Within the framework of the above-mentioned project, you will be attending on line the ICTP Advanced Quantum Mechanics Course of the Diploma Programme in Condensed Matter Physics. You will also be granted access to the relevant course resources, so that the course may be taught to MSc level students at Salahaddin University. Strong students will be then encouraged to apply to the ICTP diploma programme.

It is understood that all expenses that may be involved in the project above will be covered by your own sources.

At the end of the year, you should submit a report about the effectiveness of the training being delivered online. The document should be sent by e-mail to the Physics Without Frontiers Secretariat ([pwf@ictp.it](mailto:pwf@ictp.it)).

We look forward to hearing from you and please do not hesitate to contact us should you have any queries.

With best regards.

Yours sincerely,

Bobby Acharya  
ICTP, Physics Without Frontiers Programme

Dr. Amir A. AHMAD  
Head  
Physics Department, College of Science  
Salahaddin University
