Discussion

Most of the research papers in the literature review have studied a small part of the English language. On the other hand, our study focuses on English skills, including listening, speaking, reading, and writing.

There are several different methods between our research and the article "The Effectiveness of Using Technology in English Language Classrooms in Government Primary Schools in Bangladesh* wrote by Parvin and Salam (2015). The first thing, the participants of our topic will focus on students more. Nevertheless, the research paper on Google scholar concentrated on teachers more. On the other hand, our methods aim at collecting the rate. Our research illustrates technology that will have more opportunities to develop our English skills. On the other hand, the authors' study reveals that video conferencing promotes English communication skills. In the study "Using Facebook in English foreign language Writing Class:

Conclusion

In our research suggest that the use of technology in learning English is becoming increasingly widespread and productive for learners. Besides, knowledge also can learn from technology more easily. Due to its usability, certain kinds of technology such as educational apps, smartphones, and tablets are often used by learners. A very important role is played by searching and analyzing data. It is not easy to acquire the data. Researchers have to ask questions and collect them afterward ,The results shows that using technology in learning English is very important , surely it's more important in our area and schools to use technology for improve English language in high schools and secondary schools ,
