Hawser Company (Coordinating Manager, Part time 2010-2014)

Summary of my teaching methods

Every teacher has his or her own style, However, there are some teaching methods that I am Adapting for:

1. **Adaptability:** University students learn in a variety of ways, the method that works for one student or even most of the student. I am able to identify a student's learning style and tailor approach accordingly.
2. **Creativity:** Create an interactive learning biology methods through new updated programs.
3. **Technology:** Technology is such an integral part of society today, I am highlighted with it and ability to incorporate it into my lesson plans.
4. **Leadership:** Teacher can manage a classroom and lead students, instead of being pushed around or run over. Without good classroom management, clever teaching methods will be lost in the chaos.
