Community Development

Course book (2023-2024)

3rd Grade

Course lecturer: Dunya S. Mardan

dunya.mirdan@su.edu.krd

COURSE OVERVIEW: Community development has evolved over the past few decades into a recognized discipline of interest to both practitioners and academicians. However, community development is defined in many different ways. Most practitioners think of community development as an outcome – physical, social, and economic improvement in a community – while most experts think of community development as a process – the ability of communities to act collectively and enhancing the ability to do so.

This course will provide social work students the opportunity to have a better understanding to explore, develop, and apply an interdisciplinary set of theories in to their filed of profession. Yet, aiding students with a better understanding to describe the community around.

COURSE OBJECIVE: Students are expected to gain insights into community development as a dynamic process by which disadvantaged people develop capacity to help improve and control their lives. In order to understand this course, participants are expected to achieve an understanding for the following:

- Explore the concepts of community and community development
- Describe important aspects of community and community development
- Describe important principles of community development.
- Discuss the term sustainable development and how it applies to community
 - Development
- Discuss and give examples of the different factors which sustain development

- Understanding of the nature of community groups and social solidarities,
- Understand the nature and structures of power in society,
- Understand the function of non-profit and other community organizations,
- Understand the ways services (e.g. social, environmental, economic) are provided, and

- Understand the networks that tie community groups to each other in their local area, the region and the globe.
