

Environmental awareness/Practical Question Bank

First stage

Q1/A/ Define the following: answer (3)

1. Environmental awareness 2. Air pollution 3. Recycle 4. Ecosystem

B/ What are the measurements for sustainable development?

Q2/What are the main Steps to Creating a Public Awareness Campaign?
Discuss?

Q3/ What are the methods for control of air pollution?

Q4/ Explain Social Media as a Tool for Environment Protection?

Q5/What Is the Role of Teacher in Environmental Education?

Q6/ Do you consider yourself to be an environmentalist?

Q7/ What ways do you protect the environment?

Q8/ What methods do you use to conserve energy and other resources?

Q9/ Should we fine people for littering?

Q10/ Do you recycle?

Q11/ Do you think that recycling is effective? Why or why not?

Q12/ Which types of energy are the most environmentally friendly?

Q13/ Are humans responsible for climate change? Why or why not?

Q14/ Do you think that global warming is a threat to the planet in your lifetime?

Q15/ How has climate change impacted you personally?

Q16/ How will climate change affect the planet during your lifetime?

Q17/ What is the most important environmental issue facing our planet right now?

Q18/ How can we reduce our carbon footprint?

- Q19/ What are the main causes of air pollution?
- Q20/ What are the main sources of water pollution?
- Q21/ How is climate change affecting wildlife?
- Q22/ How can we conserve water resources?
- Q23/ Does your country have a lot of fresh water?
- Q24/ Does your country's government protect the natural environment?
- Q25/ Which countries are the worst polluters?
- Q26/ Which countries are the most environmentally friendly?
- Q27/ What are the benefits of renewable energy sources?
- Q28/ What are some ways to reduce plastic waste?
- Q29/ How does deforestation impact biodiversity?
- Q30/ What are some strategies for reducing greenhouse gas emissions?
- Q31/ Why is it important to protect endangered species? 11. How does urbanization affect the environment?
- Q32/ What are some ways to reduce energy consumption at home?
- Q33/ How can we limit the use of fossil fuels?
- Q34/ What are the effects of ocean acidification?
- Q35/ What are some strategies for reducing water pollution?
- Q36/ How can we encourage people to be more environmentally conscious?
- Q37/ What is the main cause of soil erosion?
- Q38/ Why is waste management important for the environment?
- Q39/ How can we improve air quality in cities?

Q40/ What are some solutions to reduce noise pollution? 21. How can we reduce the use of pesticides in agriculture?

Q41/ What are some strategies for preserving biodiversity?

Q42/ What are the benefits of sustainable farming practices?

Q43/ How can renewable energy sources be used more efficiently?

Q44/ What is the impact of human activities on global warming?

Q45/ How can we reduce our dependence on fossil fuels?

Q46/ How does air pollution affect human health?

Q47/ What is the importance of recycling for the environment?

Q48/ Why is it important to protect natural habitats from destruction?

Q49/ What types of pollution are bad for our health?

Q50/ Which types of environments are best for our health as human beings?

Q51/ What do you think the world should do to stop climate change?

Q52/ Are you aware of the health implications that the surrounding industrial area causes to you?

Q53/ Do you suffer from any health implications due to the pollution in the area? If so, please elaborate.

54/ In your opinion, what features are important for new building construction?

55/ In which of the following ways do you conserve energy where you live?

- Use a clothing rack to dry clothes
- Turn off lights when not in use
- Turn off electronics when not in use
- Use compact fluorescent light bulbs (CFLs)
