

Salahaddin University College of Engineering Architectural Department

Subject: Architectural Design IV

Course book: 2nd stage

Lecture's name: Design Staff

Academic year: 2023-2024

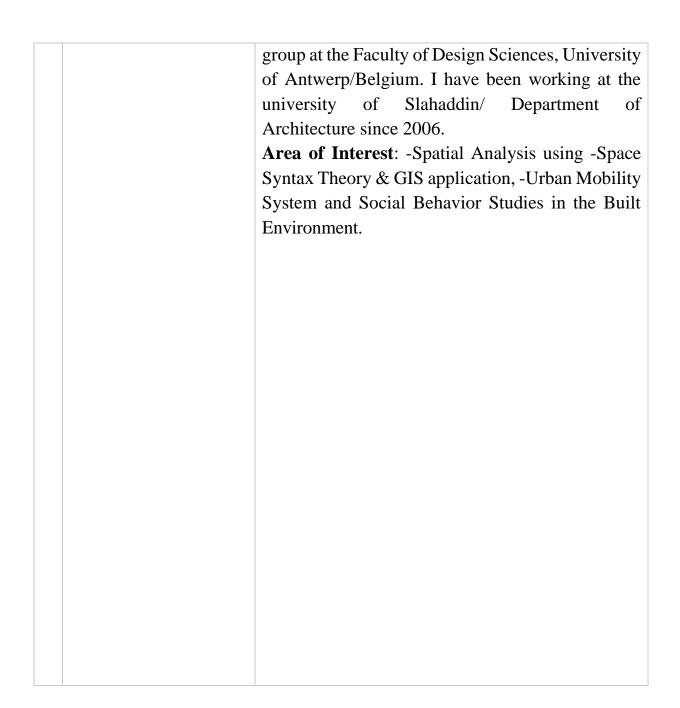

Course Catalogue:

General information

1	Course name	Architectural Design
2	Lecturer in charge	Lecturer: Hadeel Salim Eshaq Dr. Roza Marouf Dr. Sweyda Abdulla Assistant Lecturer: Hawnaz Magid Assistant Lecturer: Chra Hunar Ahmed Assistant Lecturer: Faten Radhwan Eng. Muhamed Eng. Beri Eng. Arazu
<u>3</u>	Department/college	Architecture/Engineering
4	contact	E-mail: hadeel.eshaq@su.edu.krd Tel. 07703068893 E-mail: hawnaz.abdulla@su.edu.krd Tel. 07504491320 E-mail: chra.ahmed@su.edu.krd Tel. 07507066002 fatin.yaseen@su.edu.krd 07504476318 Sweyda.aziz@su.edu.krd 0750 813 5050
<u>5</u>	Time (hr./week)	[(Theory: 2 hr.) – (Practical: 8 hr.)]/week
<u>6</u>	Office hours	Availability of the lecturer to the student during the week

<u>7</u>	Lecturers'		
	academic profile		

1- Hadeel Salim Eshaq: I have a B.SC degree in architectural engineering, graduated from college of Engineering- Architectural department /Mosul university 2001, and completed my master's study at the university of Baghdad to get a master's degree in urban and regional planning 2005. Now a doctoral researcher/ member of the research

Project's Name: Primary School (Educational Architecture) Course Objectives:

By the end of the course (Spring Semester), the students will be able to understand the following topics:

1- The basic components of Primary school. (indoor & outdoor)

- 2- The area of the different spaces in the school.
- 3- The nature of the relationship between the different spaces in the school.
- 4- The essential furniture for each space in the school.
- 5- To understand how users can influence the design.
- 6- To understand how location affect the design.
- 7- The necessary facilities in the school.
- 8- To understand how a smart building can be created.
- 9- To learn how to create architectural concepts according to architectural schools.
- 10. Understand the basic principles used by famous architects.

By this course, the students will be able to:

- 1. Identify and recognize a theoretical background about architectural schools.
- 2. Create the project space program in term of required facilities and its areas.
- 3. Analyzing the selected site plans.
- 4. Inspire the architectural concept from different levels.

Students' Obligations:

- All students are required to arrive at 9:00 AM o'clock. Allow the delay to be only ten minutes.
- -Do not use the mobile phone during the lecture.
- -Students are not allowed to leave the classroom under any circumstances unless necessary and with permission from the teaching staff.

- -It is not permissible to chew gum or food in the class and during lectures, and students may eat during breaks.
- -When the lesson ends, all students must remain in their seats until the teaching staff leaves.
- -It is not permissible to speak loudly during the lecture because it causes confusion to the lecturer and students in general.

Forms of Teaching:

These lectures are designed to help students to improve their architecture design skills to present their ideas as best as possible. Forms of teaching will be identified according to students needs by using the following teaching methods:

- PowerPoint presentation for theoretical part.
- White Board.
- Group discussion.
- Individual Feedback.
- Studio work.
- Homework.
- Using AutoCAD and 3D Programs to rendering and presentation.
- Projects Hand in (Daily and Presentation in different stages).

Assessment Scheme:

Fall Semester [Private Independent House]		
Practical Part includes:		
Define project components, Relationships (Matrix &		
Bubble diagram), Space Program and analysis, Similar	25%	
Example, Site Analysis, Day Sketch:		
Preliminary Submission	20%	
Pre-final Submission	25%	
Final Submission	30%	
Total	100%	

Course Contents:

12Weeks with 24 lectures: From the 10 th of September to 7 th of December				
Week	Theoretical Part	Practical Part	Tasks for students	
1 st lecture	Coursebook and terms definitions.	Introduction to the architectural design process and group formations.	Data Collection	
2 nd lecture	Define project components.	The area of the different spaces.	Students should define the area according to Standards.	
3 rd lecture	Project Components	Discussing students' work.	Students put this level in the final stage.	

4 th lecture	Explaining the relationships between different spaces	Zoning, Matrix & Bubble diagram	These techniques are applied by different groups.
5 th lecture	Study the furniture used for each space	Presenting furniture standards and required spaces.	Students must prepare furniture for each space in the school.
6 th lecture	How can the user influence the design? (children)	The design caters a range of ages (6-11years)	Students must take into account kid's requirements
7 th lecture	Site Plan Analysis (SPA)	Identify the site's potential and limitations and how they may affect the design.	Students must choose one location to apply the analysis.
8 th lecture	Similar Example Analysis	Discussing students' work.	Students put this level in the final stage.
9 th lecture	Starting the concept & design strategies	Apply design strategies	Develop initial ideas.
10 th lecture	Architectural schools	School design summary with different style	Students should flow a specific school
11 th lecture	Introducing the world's leading architects-Part I Richard Meier - Le Corbusier - Kisho Kurokawa	Define the principles for each architect and how can apply in the design.	Students should adopt one architect.
12 th lecture	Introducing the world's leading architects-Part II Peter Eisenman - Zaha Hadid - Frank Gehry	Define the principles for each architect and how can apply in the design.	Studio work

12th 10 ot	Interestination with a record dia	Define the mineral of the	C4., dia
13 th lecture	Introducing the world's leading architects-Part III Frank Lloyd Wright - Norman Foster - Bernard Tschumi	Define the principles for each architect and how can apply in the design.	Studio work
14 th lecture	Introducing the world's leading architects-Part IV Richard Rogers - Rem Koolhaas - Renzo Piano - Philip Johnson	Define the principles for each architect and how can apply in the design.	Studio work
15 th lecture		Day Sketch (Concept Stage)	
16 th lecture	Develop initial ideas.	Criticism	Studio work
17 th lecture	Develop ideas.	Criticism	Studio work
18 th lecture	Preliminary Submission (concept)		
19 th lecture	Study the technical level of the building.	Criticism	Studio work
20 th lecture	How can a smart building be created?	Criticism	Studio work
21 th lecture	Prefinal Presentation (Site, Plans, Elevations, Sections, 3D-Model)		
22 th lecture	Develop ideas.	Criticism	
23 th lecture	Develop ideas.	Criticism	
24 th lecture	Final Presentation (will be determined by Exam committee) (Site, Plans, Elevations, Sections, details, perspectives, 3D-Model)		

Course Program:

According to the design standards (Time Saver/ or Neufert), all ideas will be used to create a healthy environment for kids and improv the quality of life. The strategy describes how architectural design can contribute towards creating a smart building that entice students to study and play. The projects should meet children needs. The outcomes represent the things that are important to our communities and help guide official authorities and private companies.

Course Reading List:

Main Reference

-De Chiara Joseph; Callender, John 1987. **Time Saver Standards for Building Types**. 2nd edition. McRAW-Hall International Editions.

- "Architects' Data (3rd Edition)" <u>Ernst Neufert</u>, <u>Peter Neufert</u>, <u>Nicholas Walliman</u>, 2002.
- Chiles, Prue. **Building Schools: Key issues for contemporary Design.**

Note:

- This syllabus may be subject to changes, i.e, we may take either longer or shorter time to finish a topic.
- Final submission will be determined by the examination committee.
