An Introduction and definition of positive attitude

A positive attitude is about creating a good situation out of a bad situation, bringing good thoughts and attitudes out of bad thoughts and attitudes.

Positive attitude, Henry Ford (founder of Ford Motor Company) says: "Whether you think you can, or you think you can't-you're right."

factors to
increase
positive
attitudes**

6

Contributory factors to increase positive attitudes

- positive attitudes, like all other skills, can be learned and developed by corporate employees through experience, training and education.
- Some factors help to instill a positive attitude, so more attention should be paid to diet control, sleep and exercise, which will help you stay focused and healthier.
- Studies have shown that even walking, even for ten minutes, boosts mood and courage and reduces negative thinking.
- Overall, research has shown that work environment fit is very important, happy employees work better and are more productive.

**The result of
having a
positive
attitude**

8

The result of having a positive attitude

- An entrepreneur needs a lot of energy to lead all departments of the company and business institutions.
- Even when the company fails, or you see that the products and goals are not going in the right direction, the entrepreneur should not ignore the shortcomings.
- When a problem occurs he must try and learn how to reframe the solutions and answers to questions and problems.
- This can only be done if the entrepreneur has positive attitude skills and tries to develop them further.

9

The result of having a positive attitude

- Psychological studies have shown that there is a direct relationship between high productivity and a positive work environment.
- This makes the company more profitable, employees take less sick leave. This cannot be achieved unless the leader has positive attitude skills.
- positive attitude; when someone says: I can, I can, in order to do something, such attitudes and thoughts create a direct reflection and lead to self-confidence, constructive thinking, finding solutions and being optimistic.

10

The result of having a positive attitude

- It has been shown that many successful people encourage themselves for their energy and ability, for their innovation and success.
- Some believe this is the single most important factor that gives them the energy and ability to continue to reach their goals
- Being positive also leads to a better outlook on life, energy, productivity and success.

11

The result of having a positive attitude

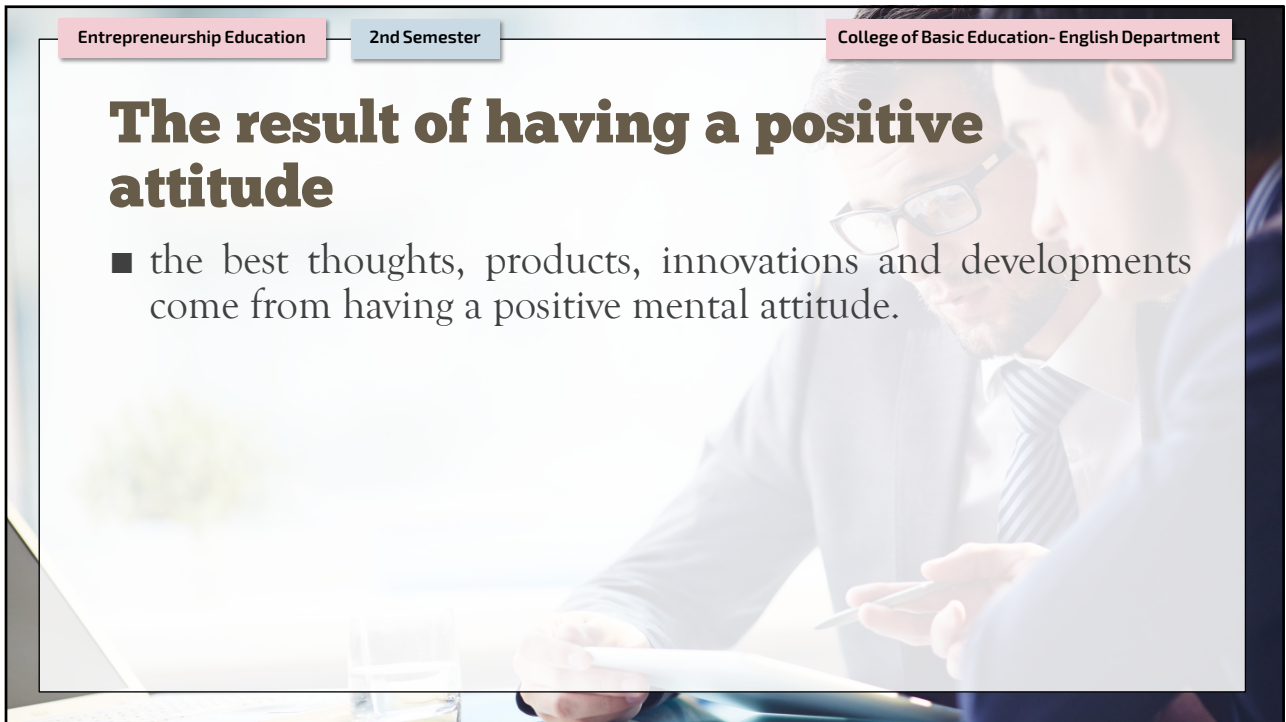

- entrepreneurs with positive attitude skills are always energetic, very motivated, even in the event of failure leads to improvement, can change a bad situation to a good situation.
- A positive attitude will lead you from a closed, stable and stagnant mindset to a developed mindset, making your mentality, goals, dreams and thoughts unlimited.
- A person with positive attitude skills certainly has a developed mind that sees countless opportunities.

The result of a lack of positive attitude

- Negative attitude is when someone says: I can't, I can't, it's difficult, they immediately create a number of negative reactions and reflections in the person's mind, bring difficulty before his work and create images of failure and shock in his imagination one cannot go forward.
- As a result of the lack of positive attitude in company employees, a lot of time, energy and money is wasted, and negativity limits the entrepreneurial mind, underestimates achievements, creates a variety of other negative feelings that eventually lead to lack of self-confidence and weakness.
