

SUE students attendance at Nassin Village summer school

Greetings,

This is a proposal to the organization to resume a program to send Salahaddin University-Erbil students to Nassin Village (the Mathematics Village) for summer school. In the past, we had a program that sent two students from the Mathematics Department, College of Science, Salahaddin University-Erbil, to Nassin Village in Turkey to participate in summer school every year. However, due to the COVID-19 pandemic, the program has been paused.

The program was very successful based on the feedback from the students and the intensive courses that they took. Besides, the courses in the program improve the quality of our students and will help them prepare for their master's and PhD degrees in the future. So, this kind of collaboration is needed because the students cannot always find such courses in the Mathematics Department at Salahaddin University-Erbil. As a result, this is a way to produce new academic staff in the different specialties.

For now, we (the committee) would kindly ask to relaunch the program and modify it a bit. In the program, we propose to send four bachelor students (we select the top two students in each of the third and fourth stages) and one academic staff member as supervisor per year. The details of the fund for this program are as follows: The Mathematics Village will cover local expenses (meals and accommodation). In addition, EMS organizations will cover the tickets for the two students, for which we expect the cost to be around 1600 USD. Furthermore, Salahaddin University-Erbil wants to cover the flight costs for two students and one academic staff member, for which we expect the cost to be around 2400 USD.

With best regards,

The committee:
