# IKC NoordRijk school

IKC NoordRijk, is a public primary school for children aged 0 to 13 years in the De Bongerd district north Amsterdam. The design of school focus on the child, with his possibilities and talents.

The design encourages children to play and interact by breaking down the physical barriers found in the typical early childhood educational architecture

---

# Design decisions about Outdoor learning

---

Large sliding glazed doors lining the interior of the ring are opened up for a majority of the year, allowing children to freely pass between indoor and outdoor areas, encouraging independence and socialization.

---

The school landscape becomes the main play space, giving students an endless path to run, jump and play and learn.

---

# Outdoor classes

---

Whatever the space, outdoor classrooms offer children a variety both educational and fun ways to get physical activity long with learning language and communication skills, creativity, and providing for social and emotional development. The outdoor classes in Noordrijk school includes

**Art, science projects, music lessons , reading time and gardening**

# Free outdoor curriculum

---

Children treated as a part of the natural environment

Tree is a normal experience of learning

# Water,sand,mud
