PhD Research Proposal		
<b>1. Title of PhD research proposal:</b>		
The Study of Some Physiological and Biomarkers parameters in Vaccinated and unvaccinated SARS-Covid 19 Patients in Erbil City		
<b>2. General information</b>		
Name and surname of the supervisor 1	Prof. Dr.Nadir Mustafa Qadir Nanakali	
Scientific title	Professor	
E-mail	Nadir.nanakali@su.edu.krd	
Mobile	07504781809	
Department	Biology	
College / faculty	Education	
university's name	Salahaddin University - Erbil	
Name and surname of the supervisor 2	Prof. Dr. Khabat Anwar Ali	
Scientific title	Professor	
E-mail	Khabat.ali@su.edu.krd	
Mobile	07504283866	
Department	Biology	
College / faculty	Education	
university's name	Salahaddin University - Erbil	
<b>2. Summary (Abstract) of PhD research proposal</b>		
<p>Since the emergency of the novel coronavirus disease (COVID-19) that is caused by SARS-Cov-2 in 2019, researchers have been on the move to find solutions to mitigate the spread of the virus. Various research efforts have been geared towards developing vaccines for active immunization to prevent COVID-19 infection among them AstraZeneca vaccine, Sinopharm vaccine and Pfizer vaccine (Halim M, 2021)(Tavilani A. et al, 2021). This work aimed for adding the knowledge of the physiological effects of coronavirus on unvaccinated patients. It also summarizes the some physiological and biomarkers in Vaccinated patients who take different kinds of vaccines.</p>
