

Pawan Faris

Date of Birth: 08 September 1985

Gender: Female

Home address: Viale Camillo Golgi, 70, Pavia, Italy, 27100

Work address: Via Forlanini, 6, Pavia, Italy, 27100

Email address: faris.pawan@unipv.it, pawan.faris@yahoo.com, pawan.faris@su.edu.krd

Phone: +39-351-6993857

CURRENT POSITION

- Lecturer (2019-up to date)

Department of Biology, College of Science, Salahaddin University, Erbil, Iraq

- Post-doctoral Researcher (2019 - up to date)

Laboratory of General Physiology, Department of Biology and Biotechnology" L. Spallanzani", University of Pavia, Pavia, Italy. Web: <https://dbb.unipv.it/assegisti-e-borsisti>.

Responsibilities: Leading and conceiving variable scientific research projects, in the field of Molecular and Cellular Biology and Physiology by utilizing the following approach: Cell culturing, Cell signaling, live cell imaging (epifluorescence microscopy), membrane channels, immunohistochemistry (Confocal microscopy), pharmacological

manipulation, gene silencing, electrophysiological recordings, 3D spheroid formation, Flow cytometry, functional assays (proliferation, migration, tubulogenesis, apoptosis, toxicity and viability) at the cellular level (primary and immortalized cell lines), 3D spheroids, Transmission Electron Microscopy (membrane cross talk identification), primary mononuclear cell isolation and expansion (Endothelial colony-forming cells), protein expression (western blotting) experimental planning and data analysis in different pathophysiological and normal conditions including cardiovascular disorder, dementia, immune and cancer.

EDUCATION

- PhD in Molecular Physiology (Cancer Biology), 2019

Split _side PhD program, Salahaddin University-Erbil, Iraq in collaboration with the University of Pavia, Pavia, Italy, 2019 Thesis: Intracellular Ca²⁺ Signaling in human colorectal carcinoma: An alternative target for anticancer treatment. Supervisors: Assis. Prof. Francesco Moccia, Assis. Prof. Mudhir Shekha. Excellent final valuation.

- Master Degree in Blood Physiology, 2012-2015

Thesis: A prospective study of some blood biomarkers and incidence of coronary heart disease among male Type 2 diabetes mellitus patients in Erbil city

Supervisor: Assis. Prof. Sarbaz I. Muhammed

- Bachelor Degree in Biology, 2008

Salahaddin University-Erbil, Iraq

TEACHING EXPERIENCES AND ACADEMIC ACTIVITIES

- Thesis Correlator of Master Degree and Undergraduate - Department of Biology and Biotechnology "L.Spallanzanni", University of Pavia, Italy. Students: Giulia Cetrone in 2018-2019, Alessia Cianci in 2019-2020, Alessia Metallo 2020-2021, Giulia bentinelli (Current master student)

- Lecturer- Salahaddin University-Erbil, Iraq (2019): Left for research activity in Italy
- Assistant Lecturer- Salahaddin University-Erbil, Iraq (2014-2017)
Courses: Theory lessons in Genetics, Animal Physiology, Advanced Molecular Biology.
- Assistant Biology- Salahaddin University-Erbil, Iraq (2008-2012)
Courses: Practical teaching in Animal Physiology, Hematology, Histology for 2nd and 3rd stages

ANALYTICAL LABORATORY EXPERIENCES

Principle Biologist (Part-time) at Private sector Barco lab-Erbil, Iraq 2015-2017
Activities: Hematological analysis: Blood smear analysis, Complete blood count (CBC), ERS, HbA1C and Biochemical analysis: Lipid profile, Kidney enzymes, liver enzymes,

OTHER RESEARCH EXPERIENCES

- Visiting Professor- Department of Earth and Environmental Science, University of Pavia, Italy, 2015

Investigation of some bioactive compound extracted from Eris persica collected from Kurdistan mountain against some pathogenic fungi (6 months of research activities and training).

Supervised by: Prof. ssa. Solveig Tosi

ORAL AND POSTER PRESENTATIONS

- **Pawan Faris.** Oxidative stress induces remodelling of the Ca²⁺ handling machinery in human aortic valve endothelial cells from patients with calcific aortic stenosis. *6TH SIRC FORUM 2022* Bari, Italy.
- **Pawan Faris,** Maione Angela Serena, Lara Lengo, Sharon Negri, Francesco Moccia. Oral presentation, 23rd Meeting of the Italian Society of Cardiovascular Research Imola, Italy, 28-30th October 2021 (XXIII CONGRESSO SIRC 2021). "Nicotinic acid adenine dinucleotide phosphate (NAADP) induces intracellular Ca²⁺ signals through activation of endo-lysosomal two-pore channels (TPCs) in cardiac mesenchymal stromal cells".
- **Pawan Faris,** Agnese Rumolo, Mauro Vismara, Matteo Tanzi, Sharon Negri, Alessia Metallo, Gianni Guidetti, Daniela Montagna, Francesco Moccia. (2021); Poster presentation at the 71th meeting SIF (Italian Physiological Society Conference) - Milan, Italy. "Hydrogen peroxide induces extracellular Ca²⁺ entry and apoptosis via transient receptor potential ankyrin 1 (TRPA1) channel activation in primary culture of metastatic colorectal carcinoma".
- **Pawan Faris,** Giorgia Pellavio, Federica Ferulli, Francesca Di Nezza, Mudhir Shekha, Dmitry Lim, Paolo Pedrazzoli, Umberto Laforenza, Daniela Montagna, Francesco Moccia, (2018); Oral presentation at the 69th meeting SIF (Italian Physiological Society Conference) - Florence, Italy. "Lysosomal Ca²⁺ signaling in metastatic colorectal carcinoma".
- **Pawan Faris,** Giorgia Pellavio, Federica Ferulli, Francesca Di Nezza, Mudhir Shekha, Dmitry Lim, Paolo Pedrazzoli, Umberto Laforenza, Daniela Montagna, Francesco Moccia, (2018); Poster presentation at Calcium day -Novara, Italy "Lysosomal Ca²⁺ Signaling in Metastatic Colorectal Carcinoma".
- **Pawan Faris** (2018); Oral presentation at the 2nd joint Annual Symposium (Life science 2018)- Pavia, Italy. " Lysosomal Ca²⁺ Signaling in Metastatic Colorectal Carcinoma".

AWARD, GRANTS AND FELLOWSHIPS

- Italian ministry of Foreign and Affairs scholarship (MAECI 2018-2019).
- Best 105 in history of Kurdish recognized women, Erbil/Iraq (2021). Hawler V1 book.
- Travel grant (SIRC Forum 2022, Bari, Italy)

OTHER ACTIVITIES

- Participation in XXIV School of Physiology and Biophysics 2021 NEURONAL BIOPHYSICS: FROM EXPERIMENTS TO MODELS, Pavia, July 5-7, 2021
- “ERN 2019 – European Research Night” – 26-29 Sept 2019
- Co-supervising 7 Italian Master Student (2018- Up to date)
- Teaching Methods and Research Methodology, Salahaddin University-Erbil (2016-2017).

MEMBERSHIPS

- Kurdistan Biology Syndicate (2008- Up to date)
- Italian Society of Cardiovascular Research, regular member (2021-Up to date)
- Global Burden of Disease Collaborator (2019-Up to date): University of Washington, USA
- European Association of Cancer Research, Member
- MDPI board reviewer (Cancers, Cells, IJMS and Nutrients).

SCIENTIFIC AND MANAGEMENT RELEVANT SKILLS

- Supervising young bursary, developing methods, organizing scientific meetings, conferences and making collaboration with foreign universities.
- Managing work staff and ability to work and lead a group.
- Extensive expertise in cell culture and assays with primary and immortal cell lines, including cell line maintenance, cells transfections, Live-cell Imaging, apoptotic signalling, PCR, q-RT-PCR, Gene silencing, Migration, proliferation and viability assay, angiogenesis, blood smear investigation, ECFCs isolation, DNA and RNA extraction, Flow Cytometry, 3D spheroid formation, Animal handling (few months of experiences) and Western blotting.
- Role as a GBD-collaborator: Collecting raw data, data analysis by GBD- analyser tools, access to the results and reviewing the manuscript.
- Extensive knowledge of Graph Pad Prism and Origin 7.0 statistical programs, Image J, all Microsoft office software programs.
- Fluent in English, Arabic, Kurdish, and intermediate in Italian.

RUNNING PROJECTS

- Tumour-infiltrating lymphocytes (TILs) activation and characterization in vitro isolated from metastatic colorectal cancer lesion. In collaboration with the Laboratory of Immunology Transplantation, Foundation IRCCS Policlinico San Matteo
- Effect of visible light on the efficacy of human endothelial colony-forming cells plated on P3HT polymer. EU Horizon 2020 FETOPEN-2018-2023 Program under Grant Agreement N. 828984, LION-HEARTED.
- Assessing the role of vascular endothelial calcium signalling in neurovascular coupling.
- Role of TRPA1 channels activation by AITC (garlic extract) on cancer hallmarks in primary culture of metastatic colorectal carcinoma.
- Role of endo-lysosomal TPC activation by NAADP in proliferation of cardiac mesenchymal stromal cells. In collaboration with Cardiology Center of Monzino

- Imbalance of calcium-dependent mechanisms in cardiac mesenchymal stromal cells from arrhythmogenic cardiomyopathy patients. In collaboration with Cardiology Center of Monzino
- Role of membrane Calcium signaling in cytotoxic effect of Tamoxifen in breast Cancer.
- Effect of novel Hadrontherapy on intracellular Ca²⁺ signaling in human melanoma. In collaboration with CNAO Hospital.
- Role of Calcium signaling in Tamoxifen induce apoptosis in Breast cancer.
