Mathematics II

Transcendental Function

Chapter Six

Shawnm Mudhafar Saleh

shawnm.saleh@su.edu.krd

Inverse of Trigonometric Function

- **Example:** Find the curve whose slope at a point (x,y) is $\frac{1}{x\sqrt{x^2-1}}$ and passes through points $(-2,2)$ and $(\sqrt{2}, 0)$.
- **Example:** find y' for $y = \sin^{-1}(1 - x)$.
- **Example:** $y = \tan^{-1} \frac{x-1}{x+1}$
- **Example:** $\int_0^2 \frac{dx}{1+(x-1)^2}$
- **Example:** $\int \frac{dx}{\sqrt{x}\sqrt{1-x}}$
- **Example:** Show that $f(x) = \sin^{-1} \frac{x-1}{x+1}$ and $g(x) = 2 \tan^{-1} \sqrt{x}$ have same derivative, then $f(x) = g(x) + c$ find c for $x=0$
