

LEAN  
URBANISM

# **WHAT IS LEAN URBANISM?**

---

**Lean Urbanism is a method of community construction that uses less resources. It eliminates the regulations, complications, and expenses that unfairly targets small-scale developers, entrepreneurs, and homeowners.**

**Lean Urbanism is a multidisciplinary movement aimed at lowering the obstacles to community formation, making it simpler to establish enterprises, and making housing and development more affordable.**

## **WHAT DOES LEAN URBANISM FOCUS ON?**

---

- Economic development on a small scale
- It focuses on the local level rather than the state or federal levels.
- Its goal is to embrace the strength of small-scale economic growth in order to strengthen local economies.

# **THIS METHOD OF COMMUNITY GROWTH HAS SOME ADVANTAGES:**

**Provides  
local Jobs**

**Lets residents  
determine what kind  
of community they  
want to build**

**Provide housing at  
lower cost**

**It builds income  
and wealth for the  
neighbors and for  
the residents**

**It's keep money  
in the local economy**

## CONCLUSION

- Lean urbanism is a new planning theory that focuses on small-scale projects.
- The project's aims include incremental successional expansion and lean urbanization.
- Cutting back on resources for small-scale undertakings.
- giving alternatives to financial, governmental, and regulatory systems, and so forth.
- Government rules impose costs on small-scale projects.
- Lean urbanism techniques give answers to challenges in government regulations.
- Finally, we can see that lean urbanism is a great idea with a lot of benefits, but we need further study to figure out how to use it in our nation.
