You are already aware that publication of research work in a peer-reviewed international journal as a Book chapter in an Edited Book also has a significant importance in career. A research paper can be published as a Book Chapter in an expanded form. It is completely legal and acceptable procedure.

We want to share good news with you. We have published more than 82 books in last 10 years. It is a pleasure for this tremendous response from researchers like you. We are going to publish your same research work you can get double benefit and it will enrich your resume.

We're happy to inform that your paper has been selected to be included as one of the chapters in our book, along with your other research papers, which have been published in other journals. If you have any questions, please contact us.
